

Supplementary Figure 3 — Genotypes and technical confounders

Associations do not distinguish biological divergence from reference-mapping bias; residual NUMT/NUPT ambiguity remains

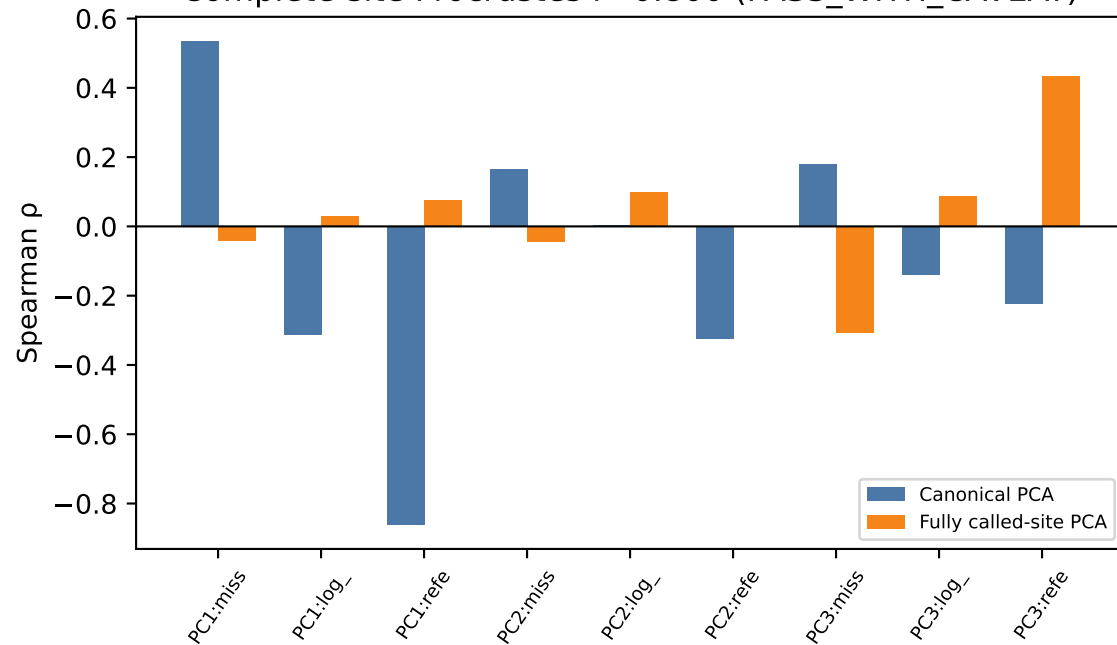

Chloroplast genotypes (first 500 SNPs)

Mitochondria genotypes (first 500 SNPs)

Chloroplast PC-QC tests
Complete-site Procrustes $r=0.800$ (PASS_WITH_CAVEAT)

Mitochondria PC-QC tests
Complete-site Procrustes $r=0.798$ (FAIL)
