

Rooted organelle phylogenies

ABAB + ABMU outgroup; GTR+F+G4; 1,000 ultrafast bootstrap replicates with BNNI

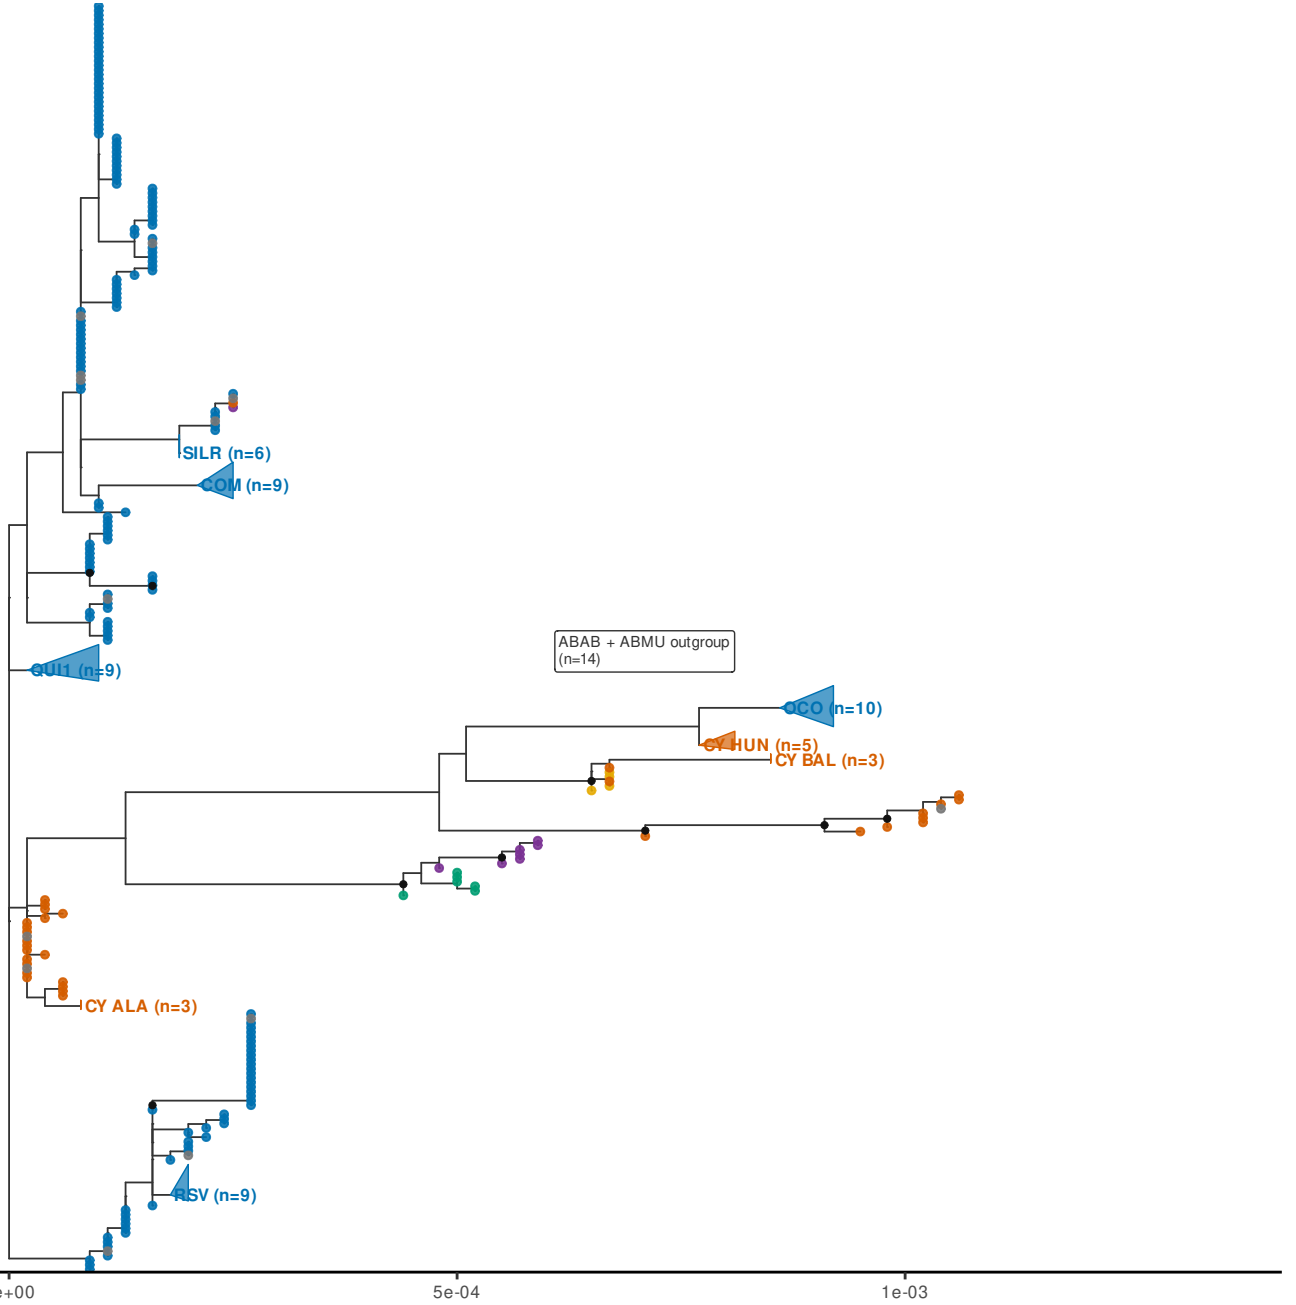

cpDNA

Maximum likelihood; rooted with ABAB + ABMU | outgroup annotated; black nodes have UFBoot >=95

mtDNA

Maximum likelihood; rooted with ABAB + ABMU | outgroup annotated; black nodes have UFBoot >=95

Population clades are collapsed only when monophyletic. Full tip labels and numerical supports are in the supplementary trees.
