

mtDNA phylogenetic tree (ggtree)

Maximum-likelihood tree; internal numbers are UFBoot support percentages (1000 replicates)

Species group

- D. abramsii ssp. abramsii
- D. abramsii ssp. bettinae
- D. abramsii ssp. murina
- D. cymosa
- D. setchellii
- unresolved

Tip-label colors are metadata annotations and do not affect tree inference. Branch lengths are substitutions per site.
